PROFILE

I am a highly motivated and dedicated Computer Science graduate with a passion for software development and support. I have a solid understanding of software development principles and methodologies, as well as excellent communication and interpersonal skills. With experience in web development, database management, and networking, I am confident in my ability to provide efficient and effective software solutions to users. I am a quick learner, a team player, and thrive in challenging environments. I am open to new challenges and can work under minimum supervision to deliver the desired results.

EDUCATION

1) Sept 2018- Dec 2022
   Maseno University
   B sc. Computer Science
   2nd Class-Upper Division

2) June 2022-Oct 2022
   Power Learn Project(PLP) Academy
   Software Development

3) 2013-2017
   Kameji Mixed Secondary School
   Grade: B (plain)

- Good understanding of Linux and windows OS and can work with both conveniently.
- Problem solving and problem solving ability.
- Good understanding of Agile and Traditional Software Development Lifecycle methods

TECHNICAL EXPERIENCE

1. Enockhan Hospital
   Software Development and IT support Engineer
   Period: 2020 – 2021
   Responsibilities:
- Communicated technical issues to development teams and collaborated with them to resolve them.
- Planning and scheduling the development process of Hospital Management system for Enockhan.
- Monitoring progress of set milestones and compiling reports.
- Analyzing requirements and designing the software specifications.
- Worked in ensuring good UI/UX of the system.
- Testing and providing feedback for improvement of the system.
- I took part in designing the databases and implementation.

2. Tephanik Inc (Voluntary).
   2019-2021
   Tephanik Inc. a tech start-up company dealing in software development.

Responsibilities:

Project management and Co-developer:

- Fronted web apps development with HTML, CSS and Bootstrap.
- Analyzing requirements and designing systems.
- Ensuring good user experience.
- Monitoring development progress to ensure deadlines are met.

PROJECTS

Personal:

I built and deployed Movies, news and weather apps integrated in one web app

project link : https://3-in-1collection.netlify.app/

Ongoing projects like online bookstore, discussion forum and others: Github repository

Group:

1. Penta

I worked with a team of five to build a real estate software for connecting real estate business with customers. I active took part in the database designs and UI design and implementation.

2. Comtra

Collaborated with others to build Comtra app aimed at connecting campus students who wants to sell and buy used items.

2. Gigsconnect

Software for freelancers and clients to meet and take jobs just like up work etc. I was the project manager and UX designer. All the three projects done in collaboration with course mates whom we had common objectives and they helped me gain experience in SDLC, software development and project management.

INTERESTS

In my free time, I enjoy participating in hackathons, attending technology conferences, and working on personal software projects. I also enjoy reading books on software development and industry trends, as well as seeking to advance my knowledge.

REFEREES

1. Enock Odhiambo
   Director at Enockhan Hospital
   Tel: +254711559779

2. Stephen Mosiori
   CEO at Tephanik Inc.
   Tel: +254790882866

3. Brian Kitunda
   Software developer at Meliora Technologies
   Tel: 0740272915
